Topic B: Biomaterials

## B01: Biomaterials Fusion: Bridging Science, Technology, and Biomedicine - General Symposium Topic B

Explore the transformative realm of biomaterials at our symposium dedicated to uniting leaders from science, technology, and biomedicine. Immerse yourself in the intricate world of biomaterial synthesis, characterization, testing, and application. The event promises deep insights into the vast interconnected sectors of medical devices, drug delivery, and tissue engineering. By looking at the interdisciplinary challenges and advancements in the field, we hope to foster a community where materials scientists, biologists, chemists, and medical professionals can discuss, collaborate, and innovate. Together, let's revolutionize the future of biomaterials in a demanding biological environment.

### Symposium Organizer

Prof. Dr.-Ing. Aldo R. Boccaccini  
Friedrich-Alexander-Universität Erlangen-N...

Prof. Dr. Cornelia Lee-Thedieck  
Leibniz Universität Hannover

Prof. Dr. Cecilia Persson  
Uppsala University
